

FIRST CIRCLE OF 19 PARTNERS

Universities and research centres

INRAE, Institut national de recherche pour l'agriculture, l'alimentation et l'environnement
 CIRAD, Centre de coopération Internationale en Recherche Agronomique pour le Développement
 Cardiff University
 Coventry University
 UNIPI, Università di Pisa
 CIHEAM-IAMB, Centro Internazionale di Alti Studi Agronomici Mediterranei di Bari
 UFRRJ, Universidade Federal Rural do Rio de Janeiro
 UFRGS, Universidade Federal do Rio Grande do Sul

University of Oregon
 University of Wisconsin-Madison
 University of Vermont

International civil society networks

Urgenci
 FIAN International

National and local organisations

Terralim
 AS-PTA, Agricultura Familiar e Agroecologia
 LWA, The Landworkers Alliance
 CIVAM Ardèche
 PNRMA, Parc Naturel des Monts d'Ardèche
 GAL Alto Salento 2020

SECOND CIRCLE OF 24 PARTNERS

Universities in and outside Europe, international institutions and networks, key national partners, from Brazil, France, Italy, United Kingdom and USA.

 This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 101007755.

ATTER

Agroecological Transitions for Territorial Food Systems

ATTER is an interdisciplinary and multi-sectoral exchange program aiming at scaling out agroecological transitions for territorial food systems.

It gathers 19 organisations (researchers and practitioners) and relies on 16 territorial case studies anchored in five countries (France, Italy, UK, Brazil and USA).

To address sustainable development goals and the challenges of food systems transitions, agroecology is increasingly recognised as a promising model and the territorial scale as an appropriate scale of analysis and action.

ATTER gathers researchers and practitioners around cross-case studies work through mobilities, trainings and workshops relying on an observatory of territorial case studies.

The ATTER network is an action-research eco-system aimed at boosting the emergence and dissemination of knowledge, innovations and tools for the agrifood systems transitions.

Grassland 2.0
Madison

BRAZIL

Borborema
Serra do Rio¹
Serra Gaucha²
Porto Alegre

ATTER'S KEY PRINCIPLES

WORKING AT THE TERRITORIAL SCALE, that of the direct interactions between ecological and social processes likely to support the reconnection of agriculture, food, environment, and health.

BUILDING ON THE DIVERSITY OF CASE STUDIES AND CONTEXTS to identify a typology of transition pathways.

PRODUCING GENERIC PRINCIPLES AND INNOVATIVE METHODS AND TOOLS aimed at facilitating transitions in other contexts, in link with practitioners and policy makers.

UK

Carmarthenshire
North Shropshire
Coventry

FRANCE

Southern Ardèche
Western Vosges
Rennes

ITALY

Alto Salento
Lucca, biodynamic wine network
Lucca, food policies

ATTER'S OUTCOMES

Knowledge exchange and skills improvement within and beyond the network.

Typology of transition pathways and understanding of transition mechanisms.

Characterisation and test of evaluation methods.

Approaches and policies to support transition.

● Rural regions/networks with diversified agriculture ● Rural regions/networks with specialized agriculture ● Urban areas
